

Valve box

OUT

Product data sheet

Valve box OUT

This box is the perfect solution for those who value functionality and high quality. Designed with the needs of green space irrigation in mind, it features an ideally sized body, an optimal valve mounting angle, and the option for valve replacement. These characteristics set our box apart in the market, making it a practical and reliable choice.

Features

➤ Functionality

With its optimal dimensions, precise valve positioning, and enhanced internal space, the box allows for effortless and straightforward irrigation system connections.

➤ Quality and Durability

This box is made from high-quality materials, ensuring durability and reliability. The reinforced lid structure and thickened body walls provide excellent resistance to mechanical damage, such as pressure from a riding mower or other vehicles during garden work. Additionally, the box is resistant to low temperatures, making it a reliable choice for year-round use.

➤ Available Versions

Valve box OUT, Black
Valve box OUT, Green

➤ Practical Solution

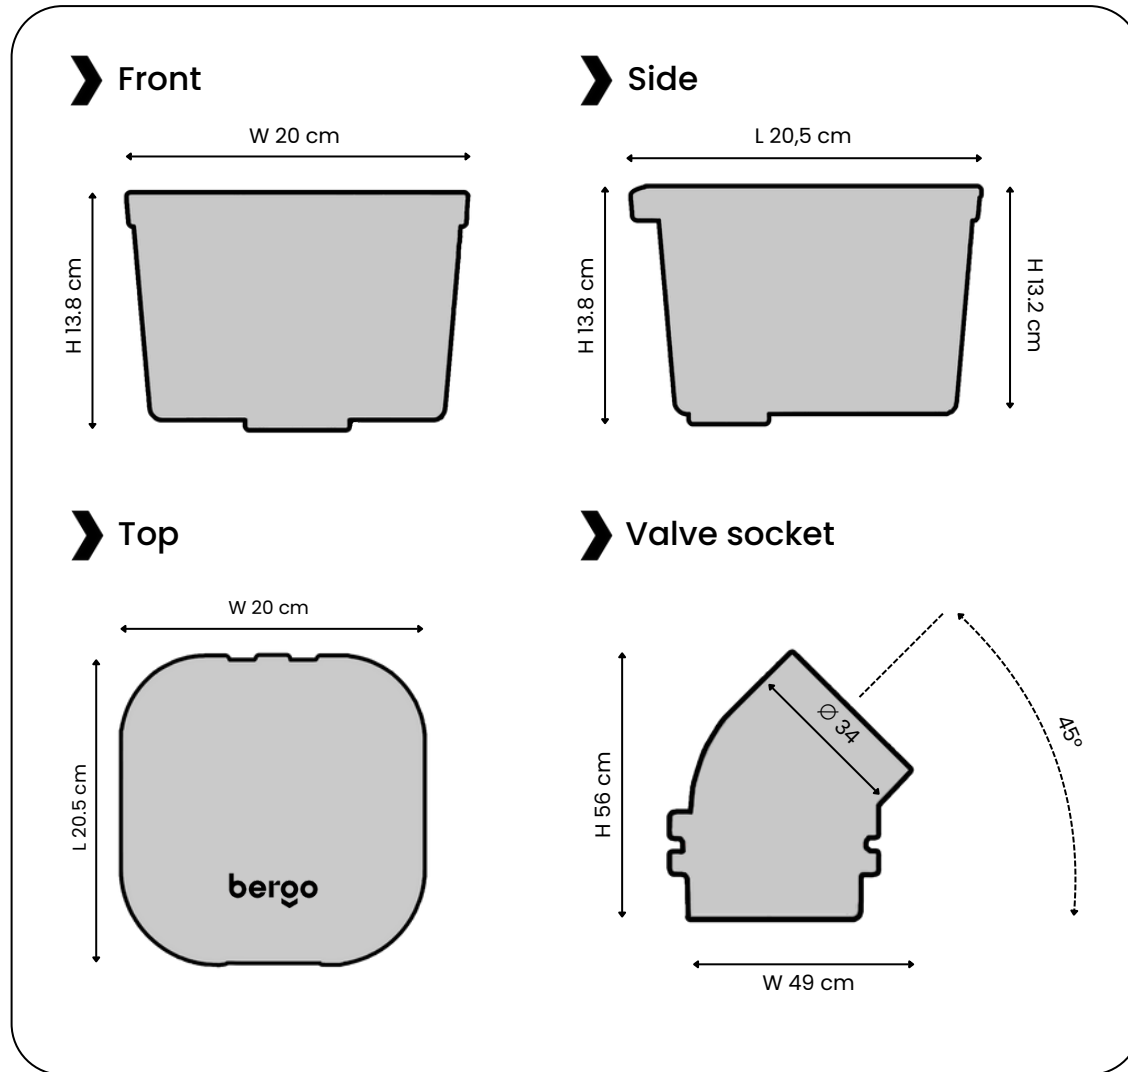

The box is equipped with a replaceable $\frac{3}{4}$ " ball valve, which is available in our range. This convenient and practical feature simplifies operation and maintenance.

➤ Convenience and Protection

The box is designed without external openings, effectively shielding the interior from dirt and debris. This ensures long-term durability and makes it easy to keep clean.
